## Enquiry Details

Enquiry Date	20-Jan-2025 at 10:15:38 AM
Type	Special Conditions
Subject	Water Filtration System

## Enquiry

Please clarify the following

"Is there a raw water sample for this project? A lot of the specified equipment is labeled as "(If required)". The main goal of the system is to treat at a combined 25 GPM and meet the GCDWQ. I would like to see the raw water quality report to make sure we are doing everything needed to meet that standard. "

## Response Details

Response Status	Completed
Response Date	24-Jan-2025 at 04:01:06 PM

## Response

Water samples are not available because the wells have not been drilled yet.

## Enquiry Details

Enquiry Date	21-Jan-2025 at 01:49:22 PM
Type	Other
Subject	Firewater Storage System Commissioning

## Enquiry

Further to the response from the Jan 21st enquiry, we are unclear on what 3rd party test is required concerning flow rate. Typically, the local fire department always comes to the site and tests their equipment to provide final approval. No flow rates are specified and there are no adjustments in the system that can be made to change the flow rates as it's a suction system and the pump is on board their fire truck, which even varies depending on the truck, age, maintenance, etc. The pipe sizes, lengths and routing are all specified as is the tank bury depth and diameter, the suction stub and anti-vortex fitting come built into the specified tank at 6", the fire department connections for their hoses have to be 6NH fittings, and their hoses are unknown lengths and the flow rate is completely dependent on the on-board truck pumps ability to suck the water out and will vary as the tank levels drop and suction head increases. Please advise on what 3rd party test(s) and parameters are going to be required if any.
